

enfinitysaas

Do you feel your operation is too small to justify the cost of a full rental software solution? Or, do you want to avoid the system administrator chores, making daily backups, or installing new software versions? With enfinitySaaS there is no need to buy, administer or maintain a server or purchase a perpetual software license.

FIVE main application areas

integrate your business operations onto a single technology platform:

1 Transaction Processing

Transaction flexibility allows for processing in any sequence. Whether, rental period, inventory information or customer information there is no predefined mandatory process. Efficiently process quotes, reservations, contracts, invoices, purchase orders, work orders

2 Database Management

Define elements like rate structures, accounting relationships, product classes, depreciation and other attributes. Taking advantage of Windows® and Cache® object technology, enfinitySaaS delivers complete data management. Utilize Customer-specific pricing and transaction printing formats (drop depreciation)

3 Accounts Receivable

enfinitySaaS provides the ability to record collection activity and view customer payment commitments historically, review and/or modify prior payment applications, and view a graph of historical “days to pay”. Receive warnings when writing transactions if customer's payment is delinquent or balance is over limit.

4 Security Management

Administer security controls with ease by setting privileges according to employee's roles in the company.

5 Report Management

enfinitySaaS comes “standard” with dozens of the most common and useful management reports as well as customized versions of reports to help you utilize your information.

save up to \$10,000 in upfront costs!!

Achieve the maximum benefit of a rental software solution with minimal investment.

- Eliminate large upfront cash outlays that come with purchasing a full system
- Remove the need for an onsite server. We have the responsibility for administering the whole system
- Significantly reduce the payback period of investing in a onsite solution

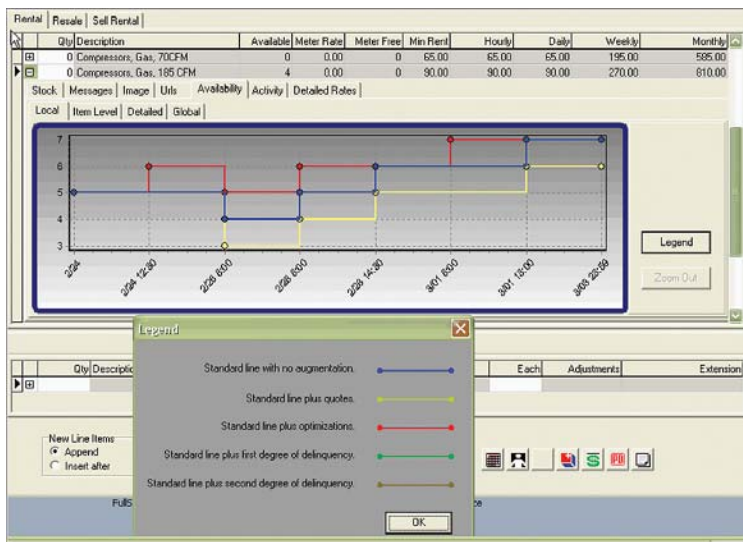

contract screen: user-friendly contract screen

enfinitySaaS user-friendly contract screen resembles a familiar, printed invoice. As you move the cursor over the screen, the areas you point to automatically change color, making them easy to identify and select. A selected area may be viewed in detail by clicking on it.

inventory availability screen

enfinitySaaS lets you view inventory availability in graph form by date range, with the ability to zoom in for a closer look at shortages and transaction details. This screen also displays optimizations, quotations, delinquent returns and other impacts on availability, all of which represent opportunities to avoid missed rentals.

simple fee structure

The initial startup fee of \$1,750 for the first user and \$500 for each additional user covers any software licenses needed, training, database creation assistance—everything you need to get started. The monthly usage fee covers support and enhancements, and ongoing use of the enfinitySaaS software.

minimal system requirements

Under enfinitySaaS, your data resides on a SBC server so that all you need is a standard PC or thin client with internet connection and Remote Desktop. We take care of the rest.

ABOUT SBC

Delivering mission-critical software solutions to the rental industry, SBC takes into account the total rental experience—from the owner/operator, to the user, to the end-consumer. For nearly three decades SBC has provided advanced technology and services to thousands of rental operators to help them better manage their daily operations and grow their business. www.solutionsbycomputer.com
